

# THE ARMY BATTLE LAB

PRESENTS...

FIGHT TONIGHT

## SMALL UAS

LEARN TO FLY sUAS

## COUNTER THE THREAT

The best way to counter the threat is by confusing the operator, **DON'T BE SEEN** helps you counter the UAS threat.

- D** - Dispersal
- O** - Overhead cover wherever possible
- N** - No straight lines in nature
- T** - Thermal signature reduction

- B** - Be aware of noticeable objects
- E** - Ears and eyes when it comes to the skies

- S** - Shine and light reduction
- E** - Easily identified tracks avoided
- E** - Every UAS reported
- N** - No movement from cover without checking the sky

## sUAS LEVEL

Sky Ranger R70 - 4500m 60min

Wasp AE System - 5000m 60min

Black Hornet Nano - 500m 20min

Shadow - 5000m 60min

## COUNTER sUAS DRILLS

- REDEYE Drill (when dismounted)**
- slowly move to cover, minimise movement

- HAWKEYE Drill (when mounted in a vehicle)**
- reduce your signature, disperse and camouflage the vehicle

- LONGBOW Drill (used for engaging enemy sUAS)**
- coordinate fire onto enemy sUAS
