

DONOVIAN ARCTIC TTP PACKAGE 2

DEFENSIVE OPERATIONS

DONOVIAN ASSESSMENT

Donovian defence is built around depth, attrition, and terrain control. Continuous defensive lines are rare. Instead, key terrain is protected through mutually supporting strongpoints.

KEY TTPs

1. Corridor Defence

Defensive positions focus on:

- Roads
- Frozen lakes
- River crossings
- Settlements
- Airfields

2. Strongpoint Network

Establish:

- Company defensive zones
- Observation posts
- Fire support positions
- Reserve locations

3. Layered Fires

Integrate:

- Mortars
- Artillery
- Anti-armour systems
- UAV-directed fires

4. Delay and Attrition

Trade space for time. Force attackers into:

- Predictable approaches
- Kill zones
- Minefields

5. Weather Exploitation

Use:

- Darkness
- Blizzards
- Cold exposure

as force multipliers.

INDICATORS

- Extensive obstacle belts
 - Defensive minefields
 - Pre-registered artillery targets
 - Occupation of forested terrain and settlements
-

VULNERABILITIES

- Static positions vulnerable to precision fires
- Dependence on logistics
- Reliance on communications
- Reduced flexibility once fixed
