

## **DONOVIAN ARCTIC TTP PACKAGE 4**

### **ENGINEER OPERATIONS**

### **DONOVIAN ASSESSMENT**

Engineers are a critical combat function. Arctic manoeuvre is impossible without engineer support.

---

#### **KEY TTPs**

##### **Mobility Support**

Construct and maintain:

- Ice crossings
- Snow-compacted routes
- Temporary roads
- Route markers

##### **Breaching**

Reduce:

- Defensive obstacles
- Minefields
- Ice barriers

##### **Counter mobility**

Create:

- Obstacle belts
- Ice craters
- Controlled route denial

##### **Survivability**

Develop:

- Hardened positions
  - Vehicle hides
  - Arctic shelters
  - Command posts
- 

#### **PRIORITY**

Engineer effort focuses on maintaining mobility corridors that support fires and logistics.

---

#### **INDICATORS**

- Route reconnaissance
- Ice measurement activities
- Equipment concentrations near crossings
- Snow route preparation
