

DONOVIAN ARCTIC TTP PACKAGE 7

COMMAND & CONTROL / ELECTRONIC WARFARE

DONOVIAN ASSESSMENT

Donovian doctrine prefers centralized command supported by extensive use of communications and electronic warfare. Arctic conditions challenge this model.

KEY TTPs

Centralized Planning

- Detailed pre-planning
- Extensive synchronization
- Heavy control measures

EW Effects

- GPS denial
- Communications disruption
- Sensor degradation
- Targeting support

C2 Resilience

Maintain:

- Analog backups
- Alternate frequencies
- Line-of-sight communications

Adaptation

When communications fail:

- Local commanders execute pre-planned actions.

INDICATORS

- Electronic interference
- Communications disruption
- Loss of GPS reliability
- Increased use of runners and analogue systems
